

A Division of Connexon

The E911 Experts.

International Emergency Services

911 Enable helps organisations using IP phone systems ensure the safety of their employees. Its uncompromising emergency response technologies provide resilient and reliable emergency support for organisations of all types and sizes.

Emergency Call Management

911 Enable's Emergency Gateway (EGW) is an on-site appliance that helps organisations worldwide address the challenges of increased IP phone mobility and security desk notification.

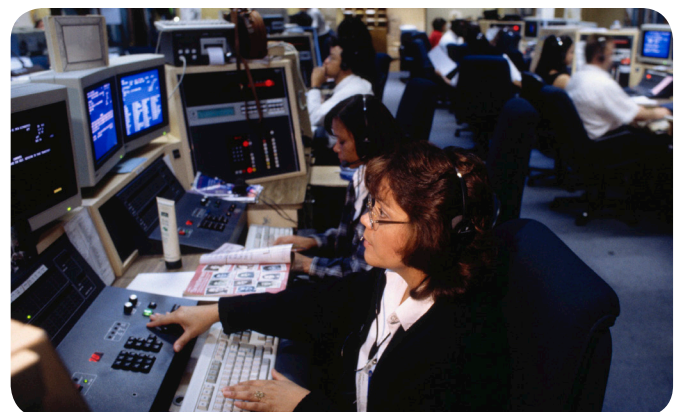

Key features:

- ✓ Automatic tracking of IP hard phones, soft phones, and wireless phones
- ✓ Enhanced security desk routing and notification, via call delivery, email, SMS, and screen pop
- ✓ A complete suite of logging and reporting functions
- ✓ Compatible with leading IP-PBX vendors including Avaya, Cisco, Microsoft, Aastra, ShoreTel, Alcatel-Lucent, Genesys, and 3Com

Emergency Call Routing for the UK

911 Enable's Emergency Routing Service (ERS) helps organisations in the UK accurately route emergency calls to the BT Emergency Call Centre. The ERS delivers 999 calls and precise location information to the Call Centre, allowing emergency responders to quickly locate 999 callers within large buildings or campus environments.
